

## khapra beetle country of export

If the products are to be exported from a khapra beetle target risk country, the following information applies.

The declarations required on the phytosanitary certificate are dependent on the treatment type used to treat the products.

**Table 3: Additional declarations that will be required on the phytosanitary certificate for high-risk plant products exported from khapra beetle target risk countries**

Treatment type	Additional phytosanitary certificate declarations required
Methyl Bromide	<p>The following declarations are required:</p> <ul style="list-style-type: none"> <li>i. "The goods were fumigated with methyl bromide in accordance with Australia's Methyl Bromide Fumigation Methodology as per the attached methyl bromide treatment certificate [insert cert number]."</li> </ul> <p>AND</p> <ul style="list-style-type: none"> <li>ii. One of the following declarations:                             <ul style="list-style-type: none"> <li>a. "The goods were fumigated in gas permeable packaging"</li> <li>b. "The goods were fumigated prior to packing"</li> <li>c. "Impermeable packaging was open during fumigation"</li> </ul> </li> </ul> <p><b>Note:</b> Certificates containing more than one of the above packaging declarations will not be accepted.</p> <p>AND</p> <ul style="list-style-type: none"> <li>iii. "Following treatment, representative samples were inspected and found free from all live species of <i>Trogoderma</i>."</li> </ul>
Heat Treatment	<p>The following declarations are required:</p> <ul style="list-style-type: none"> <li>i. "The goods were treated in accordance with Australia's Heat Treatment Methodology as per the attached heat treatment certificate [insert cert number]."</li> </ul> <p>AND</p> <ul style="list-style-type: none"> <li>ii. "Following treatment, representative samples were inspected and found free from all live species of <i>Trogoderma</i>."</li> </ul>

## All other countries

If the products are to be exported from any other country, i.e. a country not listed as khapra beetle target risk country, the following information applies.

All high-risk plant products will be required to be accompanied by a phytosanitary certificate that includes the following additional declaration:

"Representative samples were inspected and found free from evidence of any species of *Trogoderma* (whether live, dead or exuviae) in Australia's list of *Trogoderma* species of biosecurity concern".
